

# HACKATHON

**Team size: Max 5 members.**

## **Hackathon Description:**

- **Welcome to our upcoming hackathon, where innovators and problem-solvers converge to tackle real-world challenges! This event is a platform for passionate individuals to unleash their creativity, coding skills, and collaborative spirit in a dynamic and time-pressured environment.**

## **Problem Statement Release:**

- **Get ready to dive into the challenge! We'll be disclosing the official problem statement 25-30 days before the hackathon begins, giving participants ample time to brainstorm, research, and prepare for the intense coding sessions.**

A vibrant, fantastical illustration of a forest. The scene is filled with large, gnarled trees and a dense canopy. Numerous glowing yellow and orange spheres, resembling fireflies or magical orbs, float throughout the air. In the lower-left corner, a waterfall cascades over rocks. The ground is covered with various plants, including large, glowing mushrooms and clusters of small, colorful berries. The overall atmosphere is mystical and enchanting.

# HACKATHON

## **Rules:**

- **Team Formation:** Teams can consist of up to max 5 members. Participants are encouraged to collaborate and bring diverse skills to the table.
- **Technology Stack:** Participants have the freedom to choose their technology stack, ensuring that they leverage their strengths and explore innovative solutions.

## **Code of Conduct:**

- **All participants must adhere to a code of conduct promoting respectful and inclusive collaboration. Any violation may result in disqualification.**

## **Submission Guidelines:**

- **Teams must submit their final project before the specified deadline. Submissions should include a working prototype, documentation, and a brief presentation outlining the solution.**

# HACKATHON

## Judging Criteria:

- **Projects will be evaluated based on creativity, functionality, technical complexity, and overall impact. Extra consideration will be given to solutions that demonstrate scalability, user-friendliness, and potential real-world application.**

## Winning Criteria:

- **Innovation:** The degree of uniqueness and creativity in addressing the problem statement.
- **Functionality:** The effectiveness and efficiency of the solution in meeting the specified requirements.
- **Technical Complexity:** The complexity and sophistication of the technical implementation.
- **Impact:** The potential real-world impact and usability of the proposed solution.
- **Presentation:** Clarity, coherence, and persuasiveness of the team's final presentation.
